Rural ICT Guided Home-based Technopreneur Programme

The Rural ICT Guided Home-based Technopreneur (RiGHT) Programme was initiated by Sarawak Information Systems Sdn Bhd (SAINS) as a social contribution to bridge the prevailing rural-urban digital divide in Sarawak. The main beneficiaries of this program are individuals residing in the rural areas who possess the talent and interest in ICT businesses but lack of knowledge and skills to push them forward. This programme will offer these individuals the opportunity to utilise their talents to the fullest and prove themselves. This programme is part of a joint collaboration between MANRED and SAINS to drive rural development through the creation of local ICT talent.

The ultimate aim of RiGHT is to support and increase the use of ICT among communities in rural Sarawak using the current State ICT organizational infrastructure; and ultimately, improve the lives of those living in rural communities through the use of ICT. To impart ICT skills to youths from rural areas in Sarawak to be the local anchor ICT experts and Technopreneurs /agropreneurs.
